Strategic Plan during 2022-23

The IQAC of the college is engaged in efforts to improve the teaching-learning experience and the ambience in the College and to involve the students in inclusive, enjoyable, total education. The lessons learned from Covid-induced closures have shaped our motto to impart quality education and continue the good practices like online interactive sessions, sharing e-resources and videos, providing study materials through digital platforms.

For proper functioning, IQAC needs to be well constructed, comprising members from all corners of the society, personalities from administration and management. As few teacher-members of the existing IQAC have been transferred to different colleges and some of the distinguished external members also have retired from their service or transferred to different positions, there was a need for introduction of new members and restructuring of IQAC. New IQAC configuration was reconstructed and approved by the Governing Body on 12.12.2022.

IQAC felt the necessity of developing the existing infrastructure, new classrooms to facilitate teaching-learning activity in good ambience also to accommodate increasing numbers of students in every year. The aspiration of IQAC got rejuvenated when Hon'ble Chief Minister of West Bengal visited the campus on 30.11.2022 and assured of financial assistance for constructing new building in a vacant plot. Subsequently, Rupees One Crore was recommended through MPLAD fund by Shri Luizinho Joaquim Feleiro, Hon'ble MP, Rajya Sabha. As per suggestion of IQAC, college placed requisition of building plan before Public Works Department (PWD), after the selection of the Plot (adjacent to existing college building), and successful soil testing on that selected plot.

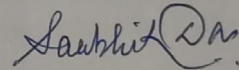

IQAC also emphasized the necessity of collaboration with different other colleges (both Government and Government aided) in different aspects of teaching-learning practices as well as social activities, through signing Memorandum of understanding (MoU). We have already signed MoU with ten-peer institutions from the district under the same affiliating University and discussion with other colleges and organizations are going on for successful completion of MoU in near future. In this way, need for domain-experts in several areas can be addressed and the horizon of the student community can be broadened through collaborative efforts.

Beside encouraging our ongoing activities like organization of seminars, workshops, outreach programs, IQAC emphasized the greater involvement of Career Counselling and Placement Cell to organize job-oriented workshops, interactive sessions and recruitment drives.

IQAC suggested greater involvement of the college in different social-welfare activities with a motto to disseminate our efforts for the betterment of society, also to make college resources accessible to the society, especially involving our NSS unit. Under the assistance of Higher Education Department, Govt. of West Bengal, and the guidance of the NSS unit of West Bengal State University, the NSS unit of Taki Govt. College has organized a 7-day special NSS camp at nearby Kathari village of North 24 Parganas from 15th to 22nd May, 2023 and adopted the village.

Department of Botany required a Medicinal Garden, as the existing 1st floor small medicinal garden is not adequate. A new medicinal garden is to be established. It is to be created in a piece of land adjacent to geography department.

IQAC also considered promotion of faculty members under CAS with ample importance. CAS proposals of 15 teachers were processed and recommended for suitable promotion.
